	Pyroptosis	Apoptosis	Resistance	Proliferation	Cell-cycle arrest	Pyroptosis	Apoptosis	Resistance	Proliferation	Cell-cycle arrest

Each value is the fraction of matched asynchronous trials reaching a fixed point with the output ON. Outputs may coexist and need not sum to 100%.
miR-204-5p OE + GSDME KO is simulated, not an experimental GEO condition; non-converged trials remain in the denominator (Table 26).
